Introduction

The sources of information contained in this report are the quarterly Canadian Travel Surveys, which are supplements to Statistics Canada's Labour Force Survey.

The surveys are conducted by Statistics Canada under co-sponsorship of the Canadian Government Office of Tourism and the Federal Ministry of Transport. The sample size was 9,000 for Quarters I, II, and IV, and 27,000 for Quarter III. While the data are reliable at the provincial level for all quarters, sub-provincial data are not completely reliable during Quarters I, II, and IV, and care should be exercised when using this data.

For purposes of the Canadian Travel Survey, a trip is defined as travel away from home of 50 miles or more one way for purposes of business, pleasure, visiting friends/relatives, or personal reasons.

The report includes a provincial overview as well as data for the seven provincial tourism regions (#1 Frontier Vista, #2 Prairie Valley, #3 Heritage Trail, #4 Woodland Park, #5 Bridge City - Saskatoon, #6 Queen City - Regina, and #7 Northern Saskatchewan). The map on the following page outlines region boundaries.
